

Position Paper Writing Template:

Country: [Country Name] (e.g., China)

Committee: [Committee Name] (e.g., United Nations Human Rights Council)

Topic: [Topic Name] (e.g., Global Climate Change)

I. Background

Provide a brief introduction to the topic, including its history, current status, and its impact on the international community. Ensure the information is accurate and concise.

- Background of the Topic:
 - a. Historical context of the topic
 - b. Overview of the current status
 - c. Impact on the international community

II. Country's Position

Detail your country's stance on the topic, including your country's interests, actions taken, and main perspectives on the issue.

- Country's Interests:
 - a. Key interests of your country regarding the topic
 - b. How the topic affects your country
- Actions Taken:
 - a. Actions your country has taken domestically and internationally to address the topic
 - b. Relevant laws, policies, or programs

- Main Perspectives:
 - a. Your country's overall view on the topic
 - b. The main issues your country believes exist within the topic

III. Proposals and Solutions

Present your country's proposals and potential solutions to the topic. These should be specific, feasible, and reflect your country's stance and interests.

- Proposals:
 - a. Specific actions your country believes the international community should take
 - b. Related policy suggestions
- Solutions:
 - a. Detailed solutions proposed by your country
 - b. Feasibility and expected outcomes of these solutions

IV. Cooperation and Commitments

Explain which countries or international organizations your country is willing to cooperate with and your country's commitments to the international community on the topic.

- Cooperation Intentions:
 - a. Countries or organizations your country is willing to cooperate with
 - b. Areas and methods of cooperation
- Commitments:
 - a. Specific commitments your country makes to the international community on the topic

b. Future action plans

V. Conclusion

Summarize your country's position, reaffirm the commitment to resolving the topic, and outline your country's vision for the future.

Sample Position Paper:

Position Paper

Country: China

Committee: United Nations Human Rights Council

Topic: Global Climate Change

I. Background

Global climate change poses one of the most significant challenges to humanity in the 21st century. The rapid increase in greenhouse gas emissions due to industrial activities, deforestation, and other human actions has led to rising global temperatures, sea level rise, and increased frequency of extreme weather events. These changes threaten ecosystems, food and water security, and human health, disproportionately affecting vulnerable populations worldwide.

II. Country's Position

China recognizes the profound impact of global climate change on both the environment and human rights. As one of the largest economies and a significant contributor to greenhouse gas emissions, China acknowledges its responsibility and is committed to playing a pivotal role in global climate action.

- Country's Interests:

- a. Ensuring sustainable economic development while reducing carbon emissions.
- b. Protecting the rights and livelihoods of its population from the adverse effects of climate change.
- c. Promoting international cooperation to address climate change and its impacts on human rights.

- Actions Taken:

- a. Implementation of the National Climate Change Program and the 14th Five-Year Plan, which includes stringent targets for reducing carbon intensity and increasing the share of renewable energy.
- b. Launch of the Emissions Trading System (ETS) to incentivize emission reductions in key industries.
- c. Active participation in international climate negotiations, including the Paris Agreement, committing to peak carbon emissions before 2030 and achieve carbon neutrality by 2060.

- Main Perspectives:

- a. Climate change is a global issue that requires a multilateral approach and collective action.
- b. Addressing climate change should balance environmental protection, economic development, and social equity.
- c. Developed countries should take the lead in emission reductions and provide financial and technological support to developing countries.

III. Proposals and Solutions

China advocates for comprehensive and collaborative solutions to mitigate climate change and protect human rights.

- Proposals:

- a. Strengthening international cooperation through mechanisms like the United Nations Framework Convention on Climate Change (UNFCCC) to ensure all countries contribute to global climate goals.
- b. Enhancing financial and technological support from developed countries to developing countries to help them transition to low-carbon economies and build climate resilience.

- Solutions:

- a. Expanding the use of renewable energy sources and improving energy efficiency to reduce greenhouse gas emissions.
- b. Promoting reforestation and sustainable land use practices to enhance carbon sequestration and protect biodiversity.
- c. Developing adaptive measures to protect vulnerable communities from the impacts of climate change, such as improving infrastructure and disaster response systems.

IV. Cooperation and Commitments

China is committed to working with the international community to address climate change and its impacts on human rights.

- Cooperation Intentions:

- a. Collaborating with countries and international organizations to share knowledge, technology, and best practices in climate mitigation and adaptation.
- b. Participating in global initiatives and partnerships aimed at combating climate change and promoting sustainable development.

- Commitments:

- a. Upholding and enhancing national commitments under the Paris Agreement.
- b. Continuing to invest in renewable energy and green technologies.
- c. Supporting international efforts to strengthen climate resilience in vulnerable regions.

V. Conclusion

China remains dedicated to addressing global climate change through sustainable development, international cooperation, and protecting human rights. By balancing

economic growth with environmental stewardship, China aims to contribute to a safer, healthier, and more equitable world for all.
